## Committed to Excellence in Quality & Safety

Columbia St. Mary's is providing a new and better patient experience by putting into place systems that build strong teams and result in better outcomes. Ultimately, all paths lead to the patient. At every step, we strive to provide the high-quality, consistent and convenient care our patients demand and deserve.

Our quality and safety accomplishments include:

- Our work in improving quality scores for community-acquired pneumonia, congestive heart failure, surgical care improvement project, acute myocardial infarction and stroke. Columbia St. Mary's strives to perform in the top 10% of all Wisconsin hospitals in these areas.
- In 2013, CSM Hospital Milwaukee Heart Care received the Mission: Lifeline® Bronze Quality Achievement Award for implementing specific quality improvement measures outlined by the American Heart Association, for the treatment of patients who suffer severe heart attacks.
- When compared to the national average, more of our patients would recommend our hospitals to their family and friends.
